About Us

For over 30 years W.L. Toomey Irrigation has been installing and maintaining automatic sprinklers throughout the Massachusetts and New Hampshire area. A Family Owner and Operated business, founder Bill Toomey and brother Jerry Toomey are both still active on every install.

With over 70 years of irrigation experience amongst the crew, we know that **every irrigation system is not one size fits all**. Every system is custom tailored to your property, taking into account factors that can often be overlooked, such as sun/shade patterns, head-to-head overlap, and decreasing overspray/water waste (to name a few).

We would love the opportunity to install your automatic irrigation system, and show you why we have been a leading choice in the irrigation industry for over 30 years!

Bill Toomey

All agreements contingent upon strikes, accidents, or delays beyond our control. Our workers are fully covered by workers compensation insurance.

NOT RESPONSIBLE FOR DAMAGES TO UNDERGROUND UTILITIES

Maintenance Moving Forward

While we design every system with robust products and longevity in mind, the harsh climate of the Northeast necessitates on-going maintenance to keep your sprinklers running at peak efficiency. Here is what you'll need moving forward.

➞ Spring Start-Up

One of our experience technicians comes to your house to go through your entire system to ensure it is operating the way it should be. This includes turning system valve on, programming automatic controller, and visual inspection of all system components (heads, valves, plumbing assemblies, etc.)

➞ Fall Winterization

With freezing temperatures, all sprinkler systems need to be drained for the winter to avoid freeze damage. Our trained technicians come out and winterize your system with compressed air to make sure your system is ready to go come the Springtime!

In addition to these routine seasonal services, we are available throughout the season for service calls and system upgrades!

Our Installation Process

Plumbing Installation

Our licensed plumber will contact you to coordinate a time to install the backflow preventer to ensure your system is up to code!

System Installation

Underground pipe, heads and every other system component is installed at your property. Most installs take a day or less to complete!

System Walkthrough

A team member will walk through all aspects of the installation and tell you everything you need to know about your new system!

Continued Service

We will add you to our customer list for you to be automatically notified for upcoming Start-Up and Winterization Services!

What our Clients are saying...

**Arthur L.
Carlisle, MA**

We have been with the Toomey Team for at least 15 years. In a service business longevity speaks volumes. They installed our system back then and have been with us for both normal maintenance and service as well as "extras". Consulted as we planned landscaping changes and tailored system as shrubs and plantings were added and/or grew.

Knowledgeable, reliable, and easy to do business with.

We used Toomey to install our sprinklers and Bill and his team were amazing! Not only did they do a terrific job, but they also walked us through everything they did and really wanted to make sure we understood every aspect. Extremely honest and fair pricing too. I couldn't recommend them enough!

**Mike E.
Woburn, MA**

**James T.
Medford, MA**

Toomey is spectacular!!! Irrigation systems can be difficult if underground pipes become an issue. Toomey has handled complicated issues like this as well as simple head replacements. They installed a new controller this spring so I can adjust my system from an armchair. They are dependable and can be counted on to open and close the system each spring and fall. When it was time to install another system at my son's house who did we call???? TOOMEY!!

I've been a customer of W.L. Toomey Irrigation and Landscape Lighting for almost 25 years. They've always done a great job for me. They're prompt, professional, and know their stuff. Whether it is an irrigation or lighting project, I would not hesitate to highly recommend these guys. They'll do it right for you.

**Brian N.
Wakefield, MA**

Plumbing

In accordance with local code, every automatic sprinkler system requires an antisiphon backflow preventer. The cost of this plumbing work is NOT included in the price above, as a licensed plumber must perform the installation of the plumbing components.

If you have a plumber you would prefer to work with, we are happy to coordinate with them in order to determine best location and timeline for installation.

If you do not have a preferred plumber, we will refer you to:

Robert F. Callahan Plumbing
(781) 953-7153

We are happy to coordinate timing on the installation, but Bob Callahan will just need access to your home to tap into the main line connection.
